02 TECHNICAL CAPABILITY STATEMENT

SWFT Certification & Direct Capability

Dee Davis Inc. is a DCSA-authorized Secured Web Fingerprint Transmission (SWFT) provider. Our SWFT certification has been active since August 3, 2022, with direct portal access to submit electronic fingerprints to the Office of Personnel Management (OPM) and the Defense Manpower Data Center (DMDC).

We perform SWFT fingerprint services directly — not through subcontractors. Dee Davis Inc. owns and operates Live Scan equipment and maintains the technical infrastructure required for electronic fingerprint capture and transmission in compliance with DCSA and OPM standards.

Service Capabilities

- ✓ Active SWFT certification through DCSA (Portal Username: DavisD)
- ✓ Electronic fingerprint capture via Live Scan equipment at existing locations
- ✓ Direct electronic submission to OPM and DMDC
- ✓ FD-258 fingerprint card processing for all federal investigation types
- ✓ Electronic Fingerprint Transmission (EFT) capability
- ✓ Web-based collection system accessible to government points of contact for scheduling and tracking
- ✓ Capacity to process up to 900 personnel per year (40 scans/month average)
- ✓ Nationwide coverage at locations convenient to personnel requiring fingerprinting
- ✓ Rejection rate maintained below 2% through quality control protocols
- ✓ Full compliance with federal privacy laws and security requirements for fingerprint data

Nationwide Coverage

Dee Davis Inc. provides SWFT fingerprint services at existing contractor locations throughout the United States. Our service model supports personnel at NSWC Indian Head Division and at remote locations nationwide. We maintain coverage through our own locations and through a network of certified partner sites, ensuring that personnel requiring background investigations have convenient access to fingerprint collection services regardless of geographic location.

Quality Control

Our quality assurance protocols ensure a rejection rate consistently below the 2% threshold specified in the solicitation. Every electronic fingerprint submission undergoes pre-transmission image verification, including ridge detail analysis, contrast validation, and print positioning review. Submissions that do not meet OPM quality standards are recaptured before transmission, ensuring first-pass acceptance rates above 98%.
