

# CONTINENTAL CARBONIC PRODUCTS

A MATHESON Company

[WWW.CONTINENTALCARBONIC.COM](http://WWW.CONTINENTALCARBONIC.COM)

Continental Carbonic Products specializes in the manufacture and distribution of dry ice (solid carbon dioxide). Continental Carbonic services customers throughout the United States and Ontario, Canada.

## WHAT IS DRY ICE?

Dry ice is the solid form of carbon dioxide (CO<sub>2</sub>). It's called "dry ice" because it does not melt like wet ice. Instead, dry ice converts into carbon dioxide gas. Because dry ice is extremely cold ( -109°F/-78.5°C), non-toxic, and completely dry, it is commonly used as an expendable refrigerant to ship frozen food or medical products or to cool materials during production. The other major use of dry ice is for dry ice blast cleaning: an effective and environmentally friendly way to clean.

## COMMERCIAL DRY ICE USES & APPLICATIONS

Continental Carbonic sells dry ice commercially to a wide array of customers:

- Airline Catering • Internet Fulfillment • Pharmaceutical • Dry Ice Blast Cleaning • Meat Processing
- Research • Food Distribution • Medical Products Shipping • Universities

### DRY ICE DELIVERY OPTIONS

One of our core philosophies is delivering exactly the dry ice our customers want...when they want it. We deliver dry ice to customers every hour of every day of the year. Continental Carbonic works hard to deliver dry ice to its customers using the least costly, most reliable method. Usually that means that we deliver with our own drivers and trucks, but when our existing route structure doesn't fit with our customers' needs, we can also utilize common carriers or courier services.

## DRY ICE PELLET

Continental Carbonic produces three sizes of dry ice pellets—regular, rice and blasting pellets.

| Description<br>(Nominal Dimensions in Inches) | Family | Nominal Weight                     | Nominal Dimensions in mm |
|-----------------------------------------------|--------|------------------------------------|--------------------------|
| High Density (1/8")                           | Pellet | Container Only                     | 3 mm                     |
| Pellet (3/4")                                 | Pellet | Container Only                     | 19 mm                    |
| Bagged Pellet (3/4")                          | Pellet | 10 lb to 30 lb (4.5 kg to 13.6 kg) | 19 mm                    |
| Rice Pellet (1/4")                            | Pellet | Container Only                     | 6.5 mm                   |

Dry Ice Regular Pellets 3/4" diameter

Dry Ice Rice Pellets 1/4" diameter

Dry Ice Blasting Pellets 1/8" diameter

## DRY ICE BLOCK

Continental Carbonic produces dry ice blocks which we typically cut to standard specifications. Dry ice can be packaged bare or in poly bags with a consumer warning label.

| Description<br>(Nominal Dimensions in Inches) | Family | Nominal Weight    | Nominal Dimensions in mm  |
|-----------------------------------------------|--------|-------------------|---------------------------|
| 1"x5"x5" (Airport Cut)                        | Block  | 1 lbs (0.45 kg)   | 25 mm x 127 mm x 127 mm   |
| 1.5"x10"x10"                                  | Block  | 7.5 lbs (3.4 kg)  | 38 mm x 254 mm x 254 mm   |
| 2"x5"x5" StakBlok™                            | Block  | 2.5 lbs (1.1 kg)  | 51 mm x 127 mm x 127 mm   |
| 2"x5"x10"                                     | Block  | 5 lbs (2.3 kg)    | 51 mm x 127 mm x 254 mm   |
| 2"x10"x10"                                    | Block  | 10 lbs (4.5 kg)   | 51 mm x 254 mm x 254 mm   |
| 2.5"x10"x10"                                  | Block  | 12.5 lbs (5.7 kg) | 63.5 mm x 254 mm x 254 mm |
| 3"x10"x10"                                    | Block  | 15 lbs (6.8 kg)   | 76 mm x 254 mm x 254 mm   |
| 4"x10"x10"                                    | Block  | 20 lbs (9 kg)     | 102 mm x 254 mm x 254 mm  |
| 5"x5"x10"                                     | Block  | 12.5 lbs (5.7 kg) | 127 mm x 127 mm x 254 mm  |
| 5"x10"x10"                                    | Block  | 25 lbs (11.3 kg)  | 127 mm x 254 mm x 254 mm  |
| 6"x10"x10"                                    | Block  | 30 lbs (13.6 kg)  | 152 mm x 254 mm x 254 mm  |
| 10"x10"x10" Full Block                        | Block  | 50 lbs (23 kg)    | 254 mm x 254 mm x 254 mm  |

10"x10"x10" Full Block

5"x5"x10" Cut

2"x5"x5" StakBlok™

2"x5"x10" Cut

2"x10"x10" Cut

1"x5"x5" Airport Cut

Please note, there can be variations in the manufacturing process resulting in dimension variation; however, they do fall within reasonable expectations of the industry.

# WHY CONTINENTAL CARBONIC?

Continental Carbonic has been supplying dry ice to customers since 1976. In our almost 50 years in business, we have grown from a small regional supplier to a leading national supplier because our business model is simple: provide our customers with great service and the highest quality product at a competitive price, on-time, every time.

## LATEST DRY ICE MANUFACTURING TECHNOLOGY

At Continental Carbonic Products, we ensure proper automated inspection procedures for any foreign object detection in the dry ice process. This mitigates risk in your supply chain to detect any abnormalities in a process by rejecting product before it leaves the production facility. We utilize proprietary box tracking technology in our supply chain to keep containers in the best condition possible in order to get quality product to your facilities with minimal losses. This will also help your supply chain to mitigate costs by transporting ice in optimal conditions to minimize sublimation. Depending on the size and packaging of your product, such as frozen foods, alternative perishables including lab specimens, optimal product and packaging suggestions are available to you from our team with decades of experience.

Alternative analyses are available upon request depending on your application and challenges you may be trying to overcome. We utilize sub cooling technology to improve the conversion rate during the dry ice manufacturing process leading to a superior product. Talk with your Area Sales Representative today. Trying to save a few pennies on price can cost you hundreds of dollars per pound in your supply chain without a thorough analysis from Continental Carbonic Products.

| Quantity of Frozen Food in Retail Packages or Wrapped |                                 |                                            |           |           |          |          |

*Dry Ice is EXTREMELY COLD (-109°)  
DO NOT taste or touch with bare hands (use gloves)  
DO NOT confine in airtight bottles or containers  
DO NOT enter poorly ventilated areas where used or stored*

## QUALITY CONTROL

To ensure our customers receive the highest quality dry ice, we video record all dry ice production and frequently test liquid CO<sub>2</sub> and dry ice purity. Independent third-party audits are conducted annually.

### **Our Continued Investment in Quality:**

At Continental Carbonic Products, all of our carbon dioxide plants which produce dry ice are FSSC 22000 certified. While not required by law, we have continued to proceed with this certification. FSSC 22000 started 15 years ago delivering an impact on food safety. The certification provides a model used in the food manufacturing industry and the related supply chain to ensure food safety standards and processes. FSSC 22000 is Global Food Safety Initiative "GFSI" recognized and follows the food chain category description as defined in ISO 22003-1:2022.

### **Quality Statement**

*The right product, the right quantity, the right time, safely delivering on commitments and sustained through continuous improvement.*

## EXTENSIVE PRODUCTION AND DISTRIBUTION NETWORK

Continental Carbonic operates a 24/7 Planning/Order Center maintaining our 99.5% on-time delivery record. Our dry ice production facilities and branch warehouse locations allow us to meet your dry ice requirements - on time, every time.

## SANITATION OF EQUIPMENT

Continental Carbonic thoroughly washes dry ice containers every time they are returned to our plants. We utilize automatic box washers with hot water as high as 185 degrees to sanitize our stainless steel dry ice containers. This allows us to **eliminate chemicals from our processes** and reduce physically handling our dry ice containers.

Continental Carbonic performs routine cleaning on all dry ice production equipment and dies. Pellet machine shrouds are used to prevent foreign material contamination during pellet dry ice production.

## THE INDUSTRY'S HIGHEST QUALITY DRY ICE CONTAINERS

### SUPERIOR CONTAINERS MINIMIZE SUBLIMATION LOSS

Dry ice converts (or sublimates) from a solid to a gas from the minute it's produced. Continental Carbonic minimizes sublimation losses by using top quality insulated dry ice containers. All food grade customers receive their dry ice in insulated, stainless steel-lined containers. Our true and honest weights and superior containers mean you get more for your money with Continental Carbonic.

### HR 30 and HR 30 SS INSULATED CONTAINERS

The HR 30 and HR 30 SS containers are the workhorse of our commercial container offerings. These containers hold approximately 1,400 pounds of pellet dry ice and 2,000 pounds of block dry ice. The containers have a capacity of 30 cubic feet, weigh 243 pounds empty with dimensions of 48"(L) x 43"(W) x 42"(H).

### HR 11 INSULATED CONTAINERS

The HR 11 container is a great option for customers with smaller dry ice requirements and for those customers needing an easily movable container. These containers are equipped with casters and have a hinged lid for better dry ice sublimation control. We recommend shipping blasting pellet in these containers as the lids can be tightly sealed to prevent dry ice clumping and sublimation. These containers hold approximately 500 pounds of blasting pellet dry ice, 600 pounds of regular pellet dry ice and 700 pounds of block dry ice. The container has a capacity of 11 cubic feet, weighs 106 pounds empty and has dimensions of 43"(L) x 28"(W) x 35"(H) (40"H with casters).

# CONTINENTAL CARBONIC LOCATIONS

Continental Carbonic has locations across the United States and in Ontario, Canada.

## COMPANY OVERVIEW

---

**Continental Carbonic Products** specializes in the manufacture and distribution of dry ice.

Continental Carbonic maintains a reliable network of over 40 manufacturing, distribution and liquid depot facilities strategically located throughout its service area. This integrated distribution network ensures that Continental Carbonic can quickly react to customers' needs.

During its many years in business, Continental Carbonic has seen the use of dry ice expand across industries because of its affordability and versatility. The demand for dry ice continues to grow with the introduction of a technology called dry ice blasting.

## COMPANY HISTORY

---

Robert O. Wiesemann Sr. and his son Robert O. Wiesemann II founded Continental Carbonic in 1976. During its first 10 years, Continental Carbonic operated as a distributor of dry ice in Illinois, Indiana, Kansas, Michigan, Missouri, and Oklahoma.

In the mid-1980s, Continental Carbonic began manufacturing dry ice in Decatur, Illinois. Continental Carbonic expanded through both acquisition of regional dry ice distributors and the construction of strategically located dry ice manufacturing facilities, providing a ready dry ice supply closer to its continually growing customer base.

In 2014, Continental Carbonic was acquired by MATHESON, one of the nation's largest manufacturers and suppliers of industrial gases and welding supplies headquartered in Irving, Texas. MATHESON is committed to supporting Continental Carbonic's impressive growth in the markets it serves.

Since becoming part of MATHESON in 2014, Continental Carbonic has added several new manufacturing facilities: Ft Meade, Florida; Madison, Mississippi; Martinez, California; Washington, Indiana; Clearfield, Pennsylvania; Denver, Colorado; El Dorado, Arkansas; Brookhaven, Mississippi; and Bridgeport, Texas.

Continental Carbonic has enjoyed an unbroken record of profitability since its inception and currently employs close to 1000 people.
