

Detroit Water & Sewage Department (DWSD)
Facilities Management Division
Pest Control Services Scope of Work

SITE HOURS

- Central Services Facility (CSF), 6425 Huber, Detroit, MI 48211
- Main Office Building (MOB), 735 Randolph, Detroit, MI 48226
- West Yard, 13401 W. Outer Drive, Detroit, MI 48239

SITE LOCATIONS

- Regular Work Hours: 7:00am to 5:00pm
- Emergency Hours: 24/7

SCOPE OF WORK

To exterminate pests, and maintain buildings, DWSD vehicles, and surrounding DWSD areas free of pests, menacing insects, and vermin using safe and proper methods in accordance with integrated pest management (IPM) requirements of the State of Michigan Pesticide Control Act and the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). Pest to be controlled includes Roaches, Rats, Mice, Ants, Gnats, Silverfish, Spiders and Bed Bugs. Other services should be available to address Bees, Wasps, Hornets, and live Small Animal trapping for a moderate cost. All services rendered will be performed on a scheduled or as needed basis.

GENERAL REQUIREMENTS:

The Contractor shall furnish all labor, equipment, and materials including canine animals to provide the pest control services that are required. All certification and training documentation, including canine certification, shall be included in the bid proposal and will be part of the evaluation process (ie: Canines used shall be certified and maintain certification with the National Entomology Scent Detection Canine Association- NESDCA).

The Contractor shall provide the necessary personnel and equipment (including animals) that is adequate to meet the maintenance schedules and perform quality of work as desired by the City of Detroit's Department of Water & Sewerage. Capacity to perform service will be a factor in award of this contract.

The Contractor shall be licensed by the State of Michigan Agriculture Department, and shall employ certified applicators.

The Contractor shall be a licensed commercial pesticide applicator and must be over the age of 18 years old. Registered technicians must be accompanied by a certified applicator.

The Contractor shall have experience eliminating bedbugs and also at least three (3) years experience as an active commercial pesticide applicator and shall include at least three (3) references with their bid. The references should also include sites where Canine

Detroit Water & Sewage Department (DWSD)
Facilities Management Division
Pest Control Services Scope of Work

detection was used for Bed Bug treatment. While on the premises performing services, the Contractor shall maintain each Site of the Department in a safe, clean, litter free, and sanitary condition.

The Contractor shall submit employee's names, vehicle descriptions and license plate numbers before starting work.

The Contractor shall limit the number of service vehicles to one (1) car and or light duty truck in a Site, and shall park said vehicles in the Department's designated parking area as not to interfere with City vehicle traffic.

The Contractor shall maintain insurance and bonding as required by the Office of Contracting and Procurement. All work and materials shall be in conformance with Federal, Stated, County, and local laws and regulations.

The Work shall include, but not be limited to; the use of repellents near entrances, the use of attractants in conjunction with bait and traps, the use of insecticides, acaricides, rodenticides, avicides, and predacides. The pesticides agents and extermination methods shall not harm, discolor, corrode, or otherwise damage the structures. It is required that all insecticides, fluids, feeds, baits, etc., be non-flammable, non-injurious to fabrics, paints, paper, and all other goods and must not be irritating to human beings. Products with obnoxious odors will be avoided. Methods of control must comply with accepted industry and regulatory agency standards. The vendor shall use scent detection canines and other means to detect the presence of pests such as bedbugs.

The vendor shall also use steam treatment and other methods to rid the area of such pests. Vendor should also have Contractor will perform spraying and baiting in all areas of the buildings in all offices, closets, janitorial closets, kitchen, and rooms. Contractor will perform spraying and baiting for rodents, roaches, bed bugs and other vermin on the same day monthly throughout the agreement. If pesticide treatment is to be applied to vehicles, then this service will be scheduled and occur upon request. An appointment will be made for the chosen vehicles, wherein at a minimum, an inspection will be conducted (possibly including a canine), the area will be prepared for treatment, the pesticide treatment will be applied, and necessary cleanup shall occur afterwards.

Note: The Contractor shall provide and submit all Material Safety Data Sheets (MSDS) to the Departments Safety Division of the pesticide agents being used on the Departments properties. With each application, the Contractor shall obtain the signature of an on-site DWSD's Supervisor on the service ticket.

The Service Ticket shall indicate the:

- Site and location/building serviced
- Name and concentration of the pesticide applied
- Amount of pesticide applied

Detroit Water & Sewage Department (DWSD)
Facilities Management Division
Pest Control Services Scope of Work

- Target pest or purpose
- Date the pesticide was applied
- Method of application

A copy of the Service Ticket shall be left with the DWSD Supervisor and also one submitted with the monthly invoice for service. In addition to servicing all locations at least twice a month, the Contractor shall respond to service calls within 24 hours, when scheduled maintenance methods are inadequate, at no additional charge to the City.

The vendor shall also be available for emergency service even after normal business hours. The City may elect to terminate the contract award if, in the opinion of the Department, the services are inadequate and the Contractor fails to correct the situation, to the satisfaction of the Department, within 10 calendar days of written notification.

Product Quality Assurance

The following products will be used to control, repel or eliminate pests.

1. Insecticides
 - a. Product name: Alpine Cockroach gel bait rotation 1 reservoir
 - b. Contains the following ingredients: Dinotefuran 0.5%
 - c. Used to control/repel/kill: Cockroaches
2. Insecticides
 - a. Product name: Alpine Cockroach gel bait Rotation 2 reservoir
 - b. Contains the following ingredients: Dinotefuran 0.5%
 - c. Used to control/repel/kill: Cockroaches
3. Insecticides
 - a. Product name: Temprid FX
 - b. Contains the following ingredients: Imidacloprid 21.0%, B-Cyfluthrin 10-.5%
 - c. Used to control/repel/kill: Bed Bugs/Labeled Pest
4. Insecticides
 - a. Product name: Transport GHP
 - b. Contains the following ingredients: Acetamiprid 22.73%, Bifenthrin 27.27%
 - c. Used to control/repel/kill: Bed Bugs
5. Insecticides
 - a. Product name: Pyrocode 100
 - b. Contains the following ingredients: Pyrethrins 1.00%, Piperonyl Butoxide 2.00% N-Octyl bicycloheptene dicarboximide 2.87%
 - c. Used to control/repel/kill: Box Elder Bugs, Earwigs, Millipedes
6. Insecticides
 - a. Product name: PT PI
 - b. Contains the following ingredients: Pyrethrins 0.5%, Piperonyl 4.0%
 - c. Used to control/repel/kill: Moths, Beetles, Weevils, Flies, Gnats

7. Insecticides

- a. Product name: Advion ant gel
- b. Contains the following ingredients: Indoxacarb technical 0.05%
- c. Used to control/repel/kill: Ants

8. Insecticides

- a. Product name: Drione
- b. Contains the following ingredients: Pyrethrins 1%, Piperonyl Butoxide 10%, Amorphous Silica Gel 40%
- c. Used to control/repel/kill: Ants, Bedbugs, wasps, fleas, bees, silverfish

9. Insecticides

- a. Product name: Tri-Die
- b. Contains the following ingredients: Pyrethrins 0.6%, Piperonyl Butoxide 4.8%, Amorphous Silica Dioxide 8.0%
- c. Used to control/repel/kill:

10. Insecticides

- a) Product name: ExciteR
- b) Contains the following ingredients :Pyrethrins 6%, Piperonyl Butoxide 60%
- c) Used to control/repel/kill: Fleas, Crawling and flying insects

11. Insecticides

- a) Product name: Precor IGR Concentrate
- b) Contains the following ingredients: Methoprene 1.2%
- c) Used to control/repel/kill: Fleas

12. Insecticides

- a) Product name: Termidor SC
- b) Contains the following ingredients: Fipronil 9.1%
- c) Used to control/repel/kill: Outdoor ants, carpenter ants

13. Insecticides

- a) Product name: Talstar XTRA Granular insecticide
- b) Contains the following ingredients: Zeta-Cypermethrin 0.05%, Bifenthrin 0.20%
- c) Used to control/repel/kill: Ants

14. Insecticides

- a) Product name: Advance Granular carpenter ant bait
- b) Contains the following ingredients: Abamectin B1 0.011%
- c) Used to control/repel/kill: Carpenter ants

15. Insecticides

- a) Product name: Alpine WSG
- b) Contains the following ingredients: Dinotefuran 40.0%
- c) Used to control/repel/kill: Ants, Centipedes, Earwigs/Labeled Pest

16. Insecticides

- a) Product name: Nuvan Prostrips
- b) Contains the following ingredients: Dichlorvos 18.6%
- c) Used to control/repel/kill: Flying Insects

17. Insecticides

- a) Product name: Bio-Gel
- b) Contains the following ingredients: Nonpathogenic bacillus
- c) Used to control/repel/kill: Gnats, Drain Flies

18. Rodenticides

- a. Product name: Resolv soft bait
- b. Contains the following ingredients: Bromadiolone 0.005%
- c. Used to control/repel/kill: Rats and Mice

19. Rodenticides

- a. Product name: Contrac Blox
- b. Contains the following ingredients: Bromadiolone 0.005%
- c. Used to control/repel/kill: Rats and Mice

20. Rodenticides

- a) Product name: Ditrac tracking powder
- b) Contains the following ingredients: Diphacinone 0.2%
- c) Used to control/repel/kill: Rats and Mice

Pest Control Services Scope of Work

INTERGRATED PEST MANAGEMENT (IPM) PLAN:

1. Service technician during regular service will conduct visual inspection to find and identify any pests. When necessary glue monitors will be utilized.
2. Service technician will monitor to established severity of pest problem.
3. Establish program to achieve total elimination threshold.
4. Utilize non-pesticide methods for example using hepa vacuums and steamers.
5. Use pesticides only when non-pesticide methods are not effective.
6. During regular service the technician will conduct a facility inspection to identify any areas where barrier exclusion will be an effective pest control method. Also, report recommendations to appropriate personnel on conditions that can be changed to ensure a pest free environment such as water leaks, sanitation issues etc.
