

TECHNICAL EXHIBIT 10 **WORK CAPABILITY LEVELS**

TASK		CAPABILITY 1	CAPABILITY 2	CAPABILITY 3	CAPABILITY 4
Improved Grounds (High Visibility) such as the main gate, parade fields, drill fields, schools, playgrounds, cemeteries, and athletic areas	Description of Service Performed	Improve Grounds (high Visibility) Garrison executes grass cutting performance standards at 100% of high visibility grass acres within the Containment area footprint	Improve Grounds (high Visibility) Garrison executes grass cutting performance standards at 75% of high visibility grass acres within the Containment area footprint	Improve Grounds (high Visibility) Garrison executes grass cutting performance standards at 50% of high visibility grass acres within the Containment area footprint	Improve Grounds (high Visibility) Garrison executes grass cutting performance standards at 25% of high visibility grass acres within the Containment area footprint
Grass Cutting (set mower height 3")	Rye, Fescue, tall Fescue, St. Augustine, Buffalo, Bermuda, Bent, Centipede, Zoysia.	Grass height 6" or 14 day interval, whichever comes later	Grass height 6" or 14 day interval, whichever comes later	Grass height 6" or 14 day interval, whichever comes later	Grass height 6" or 14 day interval, whichever comes later
Tree Pruning & Shrub/Brush Trimming	Pruning Trees	4Y	3Y	2Y	N/F
	Shrubs/brush	4Y	3Y	2Y	N/F
	Hedges	4Y	3Y	2Y	N/F
Semi-Improved Grounds (Common Areas) all other areas that don't fall into the other three categories including airfields	Description of Service Performed	N/A	Semi-Improve Grounds (Inside Common Areas) Garrison executes grass cutting performance standards to not exceed 25% of semi-improve grass acres within the Containment area footprint.	Semi-Improve Grounds (Inside Common Areas) Garrison executes grass cutting performance standards to not exceed 50% semi-improve grass acres within the Containment area footprint.	Semi-Improve Grounds (Inside Common Areas) Garrison executes grass cutting performance standards to not exceed 75% of semi-improve grass acres within the Containment area footprint.
Grass Cutting (set mower height 3")	Rye, Fescue, tall Fescue, St. Augustine, Buffalo, Bermuda, Bent, Centipede, Zoysia.	Grass height 10" or 21 day interval, whichever comes later	Grass height 10" or 21 day interval, whichever comes later	Grass height 10" or 21 day interval, whichever comes later	Grass height 10" or 21 day interval, whichever comes later
Tree Pruning & Shrub/Brush Trimming	Trees/Shrubs	-	2Y	N/F	N/F
Tree Pruning & Shrub/brush Trimming	Hedges	-	2Y	N/F	N/F
Removal of Grass Clipping and Leaves	Leaf Collection	-	2Y	N/F	N/F
Fire Breaks and Ranges: Along Fence Lines, Weapons Ranges, Along Utility Lines, etc.	Description of Service Performed: Maximum Frequency Standard Along Fence Lines, Weapons Ranges, Along Utility Lines, etc.	Cut Grass when height is minimum 16" or 4Y, whichever comes later	Cut Grass when height is minimum 16" or 4Y, whichever comes later	Cut Grass when height is minimum 16" or 4Y, whichever comes later	Cut Grass when height is minimum 16" or 4Y, whichever comes later
Unimproved Grounds (outside Cantonment area) such as undeveloped areas, grazing lands, forests, lakes, ponds, and wetlands	-	Grass height minimum 24" or 2Y, whichever comes later	Grass height minimum 24" or 2Y, whichever comes later	Grass height minimum 24" or 2Y, whichever comes later	Grass height minimum 24" or 2Y, whichever comes later

Legend:

A/R - As Required/Requested

D - Daily

1W - Once a Week

2W - Twice a Week

3W - Times a week

1M - Once a Month

2M - Twice a Month

1Y - 1 Time a Year

2Y - 2 Times a Year

4Y - 4 Times a Year

5Y - 5 Times a Year

6Y - 6 Times a Year

N/F - No Funded at this Capability Level

TECHNICAL EXHIBIT 10
WORK CAPABILITY LEVELS

Grounds Defined: Grounds consist of all land and water acreage for which an installation commander has responsibility (including outlying and satellite areas). Grounds are grouped into the following Categories:

Installation Cantonment Area(s): Are defined as the geographic area(s) comprising the most urban areas of the installation. The areas are characterized by concentrations of pedestrians and permanent assets (facilities) for non-field training purposes. The cantonment area includes, but is not limited to, family and unaccompanied housing areas, schools, medical facilities, office facilities, an airfield, industrial facilities,

Improved Grounds: This category includes acreage on which intensive landscape maintenance activities must be planned and performed annually as fixed requirements. Maintenance activities include mowing, irrigation, fertilization, cultivation, aeration, seeding, sodding, spraying, pruning and trimming; weed, dust, and erosion control; drainage; and planting for landscape effect, wind, and sound abatement, and other intensive practices. Examples are areas within the built-up section of an installation which contain lawns and landscape plants; parade grounds; drill fields; non-synthetic turf athletic field facilities; cemeteries; and similar areas.

Semi-improved Grounds: This category includes areas on which periodic recurring maintenance is performed but to a lesser degree than on improved grounds. Maintenance activities include mowing primarily for safety and security, weed and brush control, erosion control, dust control, and drainage maintenance. Examples are small arms ranges, antenna facilities, picnic areas, mowed road shoulders, ammunition storage areas, airfield shoulders and clear zones, drop zones, firebreaks, and similar areas.

Unimproved Grounds: This category includes all other acreage not classified as improved or semi-improved. Maintenance activities are generally unpredictable and normally evolve from the military mission; also, for soil, water, and wildlife conservation; floods; fires; insect infestations; and disease epidemics. Examples are bombing and gunnery areas; impact areas, training, and maneuver areas; forest areas; agricultural and grazing lands, lakes, ponds and swamps; beach and similar areas requiring limited or no maintenance.
